ARCHITECTURE + INTERIOR DESIGN

## ROMANTIC MINIMALISM

In this entirely renovated Upper East Side apartment, a new fireplace has been beautifully designed to mirror the two figures embracing in the painting by George Condo, providing a masterful focal point for the room. Filled with light, the space is furnished with sophisticated restraint. "Every furniture piece has been chosen for its architectural quality," Crina Arghirescu Rogard says. "The low three-part sofa by Edra can be configured to provide seating for small and large groups, and the Gae armchair and Menhir side table by Achille Salvagni for Maison Gerard create the intimacy and warmth that comes with inspired craftsmanship."
